

PRODUCTION OPERATIVE MACHINING

Mercia Garden Products is the leading Garden Building manufacturer in the UK and part of the £140m turnover BVG Group. We manufacture sheds, summerhouses, log cabins, playhouses and greenhouses and conduct over 100,000 home deliveries each year. Our products are sold via the large DIY Chains, Blue Chip retailers and online Specialists.

We are looking to drive further growth and need to increase capacity to be ready for, and deliver the 2021 season. As a result we have vacancies in Packing, Assembly, Machining and Material Handling.

Machining

£8.72 - £9.50ph + bonus (Depending on experience and ability)

We have a wide variety of machines producing the material required to make garden buildings and full training is given by our in house team. It's a physical job, loading and unloading timber, but this is coupled with mechanical set up and machine programming to ensure materials are prepared to the required specification.

Within our team structure, operatives can become line leaders, line leaders can become Team Leaders and Team Leaders can become Managers.

Applications are sought from people who can demonstrate reliability, a willingness to learn, a hard work ethic and the attitude to get things right first time.

Schedule:

10 hour shift
Day shift
Monday to Friday
Overtime

Job Type: Full-time

Additional pay: Bonus scheme

Benefits: On-site parking

Work remotely:

No
